MOSCOW CITY COUNCIL OF PEOPLE DEPUTIES

REGULAR COMMISSION OF NATIONAL HEALTHCARE

13 Tverskaya Street, Moscow tel. 924-65-68

May 26, 1992 #55-12/2-182

CONCLUSION

Registration of the non-profit organization the Moscow Center of Medical Assistance for the patients with paralysis

Regular Commission of National Healthcare considered the registration application from the Moscow Center of Medical Assistance for the patients with paralysis. Provided by the Center Statute and other documents determine the main objective of its activity as providing on the discounted basis medical assistance and rehabilitation to the patients with neurological and neuro-muscular disorders, mainly residing in the Moscow region. With that, the financing of such activity will be implemented through off-budget sources paid for by the sponsors and through the profit from the activity of the Center itself. An important fact is that the testing and methods are used for treatment and rehabilitation that have been approved by the USSR Ministry of Health developed by the school of the Doctor of Biological Science V.N. Vassiliev, the effectiveness of which was proved not only in Russia but also abroad. The line to get such treatment in the present moment exceeds 27 thousand people.

Taking into account the facts mentioned above, the commission considers to petition before the Interdepartmental Commission of the Moscow Council on the subject of public associations and mass media about the registration of the Moscow Center of Medical Assistance for the patients with paralysis since it is a multi-purpose successor of the All-Soviet-Union of the USSR Ministry of Healthcare Center of Medical Assistance for the patients with paralysis.

First and last name of the commission chairman: V. N. Nutrihin
